

Yangyuanchen Liu

5837 Western Run, Baltimore, MD 21209 | yliu664@jh.edu | (+1) 984-377-9517 | [Google Scholar](#) | [Personal Page](#)

Education

Doctor of Philosophy (PhD) — Sep 2020 — Sep 2024 *Duke University, Durham, NC*

- Advisor: John Dolbow

Master of Science (MS) — Sep 2017 — March 2020 *Shanghai Jiao Tong University, Shanghai, China*

- Advisor: Yongxing Shen

Bachelor of Engineering (BE) — Sep 2013 — July 2017 *Jilin University, Changchun, China*

Employment

Postdoctoral Fellow — Oct 2024 — Oct 2026 *Johns Hopkins University, Baltimore, MD*

- Advisor: Somnath Ghosh

Research Aide Technical — May 2023 — Aug 2023 *Argonne National Lab, Lemont, IL*

Teaching Assistant — Aug 2020 — May 2021 *Duke Kunshan University, Kunshan, China*

Publications and Preprints

- Liu, Y., & Ghosh, S. (2026). Neural operator-based damage sensing digital twin for piezocomposites with parametrically upscaled coupled constitutive damage model. *Computer Methods in Applied Mechanics and Engineering*, 461, 119169. <https://doi.org/https://doi.org/10.1016/j.cma.2026.119169>
- Torres, D. E., Zeng, B., Costa, A., Liu, Y., Jiang, W., Dolbow, J. E., & Hu, T. (2026). RACCOON: A versatile framework for variational approaches to fracture with coupled field phenomena. *Advances in Engineering Software*, 221, 104242. <https://doi.org/10.1016/j.advengsoft.2026.104242>
- Kumar, A., Liu, Y., Dolbow, J. E., & Lopez-Pamies, O. (2024). The strength of the brazilian fracture test. *Journal of the Mechanics and Physics of Solids*, 182, 105473. <https://doi.org/10.1016/j.jmps.2023.105473>
- Liu, Y. (2024). A computational framework for simulating crack nucleation and growth in materials subjected to dynamic loads [PhD thesis]. In *Duke University* (p. 153).

Presentations

- Liu, Y.** (2026). *Damage sensing digital twin for piezocomposites integrating neural operator with parametrically upscaled constitutive damage model*. USACM Student Chapter Seminar Series.
- Liu, Y., & Ghosh, S.** (2026). *Virtual damage sensing digital twin for piezocomposites integrating neural operator with parametrically upscaled constitutive damage model*. 20th U.S. National Congress on Theoretical and Applied Mechanics (USNCTAM26). <https://www.usnctam26.org/home>
- Liu, Y., & Ghosh, S.** (2026). *Virtual damage sensing digital twin for piezocomposites integrating neural operator with parametrically upscaled constitutive damage model*. Enabling Multifunctionality through AI Informed Material Discovery and System Design (GRC 2026). <https://www.grc.org/multifunctional-materials-and-structures-conference/2026/>
- Liu, Y., & Ghosh, S.** (2026). *Virtual damage sensing digital twin for piezocomposites integrating neural operator with parametrically upscaled constitutive damage model*. HEMI Day 2026. <https://hemi.jhu.edu/event/hemi-day-2026/>
- Kumar, A., Liu, C., **Liu, Y.**, Dolbow, J., & Lopez-Pamies, O. (2024). *The revisited phase-field approach to brittle fracture: Application to the diametral compression and wing-crack problems*. The 16th world congress on computational mechanics (WCCM16).
- Liu, Y.**, Lopez-Pamies, O., & Dolbow, J. E. (2024). *A phase-field approach for the nucleation and propagation of dynamic cracks*. The 16th world congress on computational mechanics (WCCM16).
- Liu, Y.**, Zhong, P., Lopez-Pamies, O., & Dolbow, J. E. (2023). *A model-based simulation framework for coupled acoustics, elastodynamics, and damage with application to nano-pulse lithotripsy*. The 17th united states national congress on computational mechanics (USNCCM17).
- Liu, Y.**, Claus, S., Kerfriden, P., Chen, J., Zhong, P., & Dolbow, J. E. (2022). *Model-based simulations of pulsed laser ablation using a CutFEM method*. The 15th world congress on computational mechanics (WCCM15).
- Liu, Y.**, Cheng, C., & Shen, Y. (2019). *A homogenization-based phase field approach to fracture*. The 15th united states national congress on computational mechanics (USNCCM15).
- Liu, Y.**, Cheng, C., & Shen, Y. (2019). *A micromechanics-based phase field approach to fracture*. The 2nd international conference of mechanics of advanced materials and structures.
- Liu, Y.**, Weng, K., & Shen, Y. (2019). *A manifold learning approach for multiscale phase field evolution for fracture*. The international conference on data driven computing and machine learning in engineering.
